Transparent & Accessible

Q Corp has aggregated claims to produce quality and utilization data since 2008, adding cost data in 2015. Delivered through a public website, provider portal, and direct reporting to clinics, health plans, state agencies and other health care stakeholders, this unbiased information is one of the ways Q Corp delivers on its commitment to transparent, community-wide reporting on the health care provided to Oregonians.

Comprehensive & Validated

Q Corp maintains an unparalleled claims data set covering over 80% of Oregonians stretching back over 10 years. As patients move from one health plan to another, or across geography, Q Corp keeps one continuous record that provides a unique perspective on the health care usage of Oregonians - deeper than any single health plan, hospital, or physician office could offer. The community can rely on Q Corp data; analysts have worked with it extensively over many years to produce valuable and validated results.

Pioneering & Innovative

For years Q Corp has been known for innovation in the measurement of health care quality. This same spirit is now being applied to lowering health care costs, developing alternative payment models, and optimizing health care usage.

Designated Qualified Entity by CMS. First Qualified Entity to publicly report Medicare Data.

Actionable Data for the Health Care System

Total Cost of Care Reports

Q Corp is piloting production of cost of care measures which can be reported to primary care clinics and the public and compared across regions. Q Corp provides clinic comparison reports for clinics and medical groups to see how they compare to other groups on both total cost and utilization.

Provider Reporting Portal

Clinics and medical groups have access to Q Corp's robust Reporting Portal. The Portal contains claims data from most health plans operating in Oregon across all markets (commercial, Medicaid, and Medicare). Through regular data updates, clinics and medical groups are able to access timely, comprehensive reports on their quality, cost and utilization.

Public Reporting

Q Corp reports key quality, utilization, and cost measures to the public, health care industry leaders and policymakers via its website and statewide report, updated annually. Compare Your Care is one of the few places where the public can receive this kind of information on health care in Oregon.

Payer Portal

Beginning in spring 2018, payers participating in Q Corp's Data Collaborative will have access to the Payer Portal, providing unparalleled visibility into their own performance on quality and utilization measures as compared to other payers in the state.

Stakeholder and Community Engagement

Neutral Convener Services

Q Corp convenes health care leaders to guide the Data Collaborative and other Q Corp programs, offering a neutral table to share ideas and tackle common challenges. For example, the Cost of Care Steering Committee guides the implementation of cost of care and payment reform products and services.

Broadening Our Reach

In 2017, Q Corp merged with HealthInsight, a private, nonprofit, community-based organization dedicated to improving health and health care. Together, our organizations will be able to leverage our respective community efforts to achieve broader reach and engagement, and to produce Triple Aim results as efficiently as possible in Oregon and across the four-state HealthInsight region.
